

REPLACING EXISTING SIEM

GOALS

Replace existing SIEM, increase log processing and storage capabilities, add new functionalities not offered by previous solution (IDS, Canaries,...)

Reduce licensing costs
Outsource maintenance of the solution

SOLUTION

Full managed service SIEM ,
IDS, advisory. well suited for
customer reduced security team

Scalable solution adapted
to customer growing and
changing needs. Increase in
log storage capabilities is not
prohibitive

Local support and
custom solution
Direct access to
engineering and support

BENEFITS

1.5TB of log storage per day, local support, additional functionalities, and cost divided by 50%.

SETUP

4 WEEKS

CONTEXT

Large Telco company , several hundreds employees. Our customer was using a well known SIEM (in house) to store all the logs for compliance reasons. In this context, the licensing costs and pricing-model of his previous SIEM was not adapted and unsustainable.

Customer was facing a double challenge : log volume has increased up to **1.5TB of logs per day** and customer had to reduce the costs.

Security team is reduced to the strict minimum : 1 person
